

AMENDMENTS TO CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A wireless input device, comprising
a body having an opening; and
a power-supply module arranged to carry at least one battery;
wherein the power-supply module is arranged to be inserted together with said battery
into said opening in order to supply power from said battery to said wireless input device, said
power-supply module being arranged to be drawn out from the opening together with the battery
for replacement of the battery, said power-supply module having a cover whose outline matches
an outline of the body so as to form part of a housing of the wireless input device when the
power-supply module is inserted into said opening.
2. (Previously Presented) The wireless input device as claimed in claim 1, wherein the body has
a circuit board, and at least a metal plate extending from the circuit board for electrically
contacting the battery.
3. (Previously Presented) The wireless input device as claimed in claim 1, wherein the power-
supply module has a carrier for containing the battery;
each of the side of the carrier having a flange, and correspondingly each side of the
opening having a groove for receiving the flange.
4. (Previously Presented) The wireless input device as claimed in claim 1, wherein the power-
supply module is fixed to the body by a fixing device.

Serial Number 10/620,334

5. (Previously Presented) The wireless input device as claimed in claim 4, wherein the fixing device includes a hook located on the body, and a recess correspondingly located on the power-supply module.

6. (Previously Presented) The wireless input device as claimed in claim 1, wherein the wireless input device is a computer mouse or trackball.

7. (Canceled).

8. (Previously Presented) The wireless input device as claimed in claim 1, wherein the wireless input device is a game controller.

9. (New) The wireless input device as claimed in claim 1, wherein the power-supply module has a carrier for containing the battery, and wherein the battery is replaceable by on the carrier by drawing out the power-supply module from the opening as if pulling out a drawer.
